

# DT 48 A.00

Dynamic Audiometric Headphone

Order # 101.060

## FEATURES

- Audiometric version according to DIN 45 620
- High quality transducer elements, selected in pairs
- Colour coded right/left designation
- Supra-aural rubber ear caps
- Straight open-ended cable fixed to the headphone

## APPLICATIONS

The DT 48 A.00 is a special headphone for aural-acoustical investigations and measurements for ear, nose and throat specialists as well as at universities and research centres. The DT 48 A.00 features excellent ambient noise attenuation due to the closed design.

The matched transducer elements have an impedance of 5  $\Omega$  per system and are carefully selected to achieve a maximum frequency response deviation of  $\pm 1$  dB. The coupling to the ear is supra-aural by utilising flat rubber ear caps. Easy lateral identification by means of coloured coded covers correspond to accepted standards. The cable is supplied bare-ended so that specialist connectors can be used.

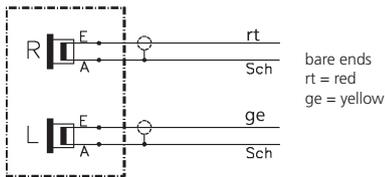

## SPARE PARTS

- EDT 48 R Rubber ear pads . . . . . Order # 907.313  
BN 59-17 Headband pad . . . . . Order # 126.713

## TECHNICAL SPECIFICATIONS

- Transducer type . . . . . Dynamic  
Operating principle . . . . . Closed  
Frequency response . . . . . 16 - 20,000 Hz  
Nominal impedance . . . . . 5  $\Omega$   $\pm$  10% per cartridge  
Nominal output power . . . . . 200 mW  
Nominal SPL . . . . . 110 dB<sub>SPL</sub>  
(500 Hz, 1 mW at 5  $\Omega$ )  
Nominal T.H.D at 1 kHz . . . . . < 1%  
Nominal headphone pressure . . . . . 5 N  
Isolation of ambient noise . . . . . 12 dB(A)  
Sound coupling to ear . . . . . Supra-aural  
Weight (without cable) . . . . . 400 g  
Colour identification . . . . . Red cover = right  
Blue cover = left  
(all specifications acc. to EN 60 268-7)
